a
Calibrated tests
Lesion permutation
Studentised lesion
CR2 (Bell-McCaffrey)
Within-lesion sign-flip
single-section screens
size-adjusted power
lesions per knockout
b
Design effect (RMSE 0.27)
simulated
design effect, eff. 1
design effect, eff. 0.77
lesions per knockout
c
Count-level realism
power, δ = 0.5
power, δ = 1.0
type-I error
lesions per knockout
d
Perturb-map lesion counts
25 codes ≥ 20
31 codes ≥ 10
lesions (8 mice)
Pro-Code (ranked)
